Integrated XYZ-Homework in Canvas

Welcome to Math 126! In this course, we will be using XYZ-Homework as the platform. You'll be submitting your homework and quizzes in XYZ-Homework.

Since I have integrated your XYZ Homework course into Canvas, you do **not** need the Course ID. Instead, you must click on the links in Canvas.

The first time you log onto Canvas, please click on the "Modules" icon, then click on any of the assignments, and it will prompt you to either log into your existing account or create an account. This only happens the first time when you click on a link connecting your XYZ Homework account to Canvas. Afterward, clicking a link will go directly into the assignment, and the grades will automatically transfer to the Canvas grade book.

Please note that if you do **not** click the Canvas link and instead go directly to XYZ Homework to do an assignment, that grade will not transfer to the Canvas gradebook. So, please do your homework and quizzes by directly logging onto Canvas.

You will get a 15-day free trial. After the 15-day free trial, you must enter an access code for XYZ-Homework or purchase access directly online through XYZ-Homework.

The discount code for XYZ is: XYZF25

If you want to activate your account before the 15-day free trial expires, click the "activate your account" link, which will appear in a red banner at the top of your Canvas-integrated assignment. If you don't do that, on day 16, clicking on a Canvas link will just take you directly to the payment screen.

If you have any questions about how to enroll in XYZ or need help, please email XYZ support at

support@xyzhomework.com

Please let me know if you have any questions!
